

# Solutions for atypical shipments

## What is an atypical shipment?

There is a shipment that is difficult to handle. Mainly because it exceeds the permitted dimensions, weight, or does not have a regular shape, is insufficiently packaged, it is not possible to sort it on an automatic line.

## Atypical shipment

- one side of the shipment is longer than the maximum allowed size
- maximum length per side is 200 cm
- shipments insufficiently packaged
- consignments of significantly irregular shape, consignments of which some protrude, etc.
- unpackaged tyres for cars and motorcycles (max. number of tyres without rim in one package 2 pcs max. 18", tyres with rim 1 pc max. 18")
- bag-shaped shipments

## PPL Parcel Max+ Parcels Handed Over to DHL Freight Pallet Shipping

- longest side dimension more than 200 cm
- the sum of the circumference and length is more than 360 cm
- weight more than 50 kg
- tyres for cars and motorcycles in larger than the permitted size and quantity (see Atypical shipment)

## Exceptions

### Shipments that do not fall into the category of atypical package

- envelopes and flyerbags
- compact bundle of up to two equal-sized packages of regular shape
- cardboard with a solid and flat base

Properly packaged shipment - more on [www.ppl.cz](http://www.ppl.cz)
